

ANIMAL SCIENCE SEMINAR SERIES

SPRING 2024

FRIDAYS FROM 12:20 - 1:10 PM - GEORGE WHITE 209

JANUARY 19

No Seminar

Students Enrolled in ANSC 5694 to Meet with Dr. Mancini to Discuss Syllabus.

JANUARY 26

Ethan Lee, Chemical Health & Safety Specialist II, UConn EHS

Lab Safety and Chemical Waste Retraining.

FEBRUARY 2

Jodie Allen, PhD Student, UConn Department of Animal Science

Application of Nanotechnology for Improving Safety in Poultry and Poultry Products.

FEBRUARY 9

Issabelle Ampofo, PhD Student, UConn Department of Animal Science

Genomic Evaluation and Genetic Parameters for Acute Hepatopancreatic Necrosis Disease (AHPND) Resistance in *Penaeus vannamei* (Pacific White Shrimp): Insights from Controlled Challenge Experiments and Population Genomics.

FEBRUARY 16

Gopi Yalavarthi, MS Student, UConn Department of Animal Science

Molecular Detection of *Strongylus* Species, Microbiome Characterization Related to Housing and Parasitic Infection on the Basis of Cytokines in UConn Horses.

FEBRUARY 23

Yuying Ren, PhD Student, UConn Department of Animal Science

Characterizing the Myogenic Effects of Sustained Probiotic Supplementation on Muscle Growth in Broilers.

MARCH 1

Molly Riser, PhD Student, UConn Department of Animal Science

Utilization of Genomic Selection on Complex Behavior Traits in Labrador Retrievers.

MARCH 8

Agustín Curutchet, MS Student, UConn Department of Animal Science

Exploring Alternative Approaches for the National Argentine Angus Cattle Genomic Evaluation Program.

MARCH 15

No Seminar

Spring Recess.

MARCH 22

Gaurav Dutta, PhD Student, UConn Department of Animal Science

Comparison of Changes in Genome-Wide Associations using Different Population's Subset in Simulated Data.

MARCH 29

Sulthana Muttathukonam, MS Student, UConn Department of Animal Science

Dietary Supplementation of Cheese Protects Mice from Relapsing Colitis and Improves Gut Health.

APRIL 5

Santhi Priya Voggu, PhD Student, UConn Department of Animal Science

Betaine Supplementation and Maternal Nutrient Restriction: Influences on Growth Parameters in Sheep Offspring.

APRIL 12

Leya Viju, PhD Student, UConn Department of Animal Science

Efficacy of linalool in reducing *Salmonella* Enteritidis and *Campylobacter jejuni* in broiler chickens.

APRIL 19

Divya Joseph, PhD Student, UConn Department of Animal Science

Antivirulence Effect of Cannabidiol Against *Listeria monocytogenes*.

APRIL 26

TBD
