Introduction to Brewing Science

ANSC 1695-001 (3 Credits)

No Prerequisites - Open to All Students! An introductory level course for students interested in the science of beer production. Topics discussed include the history of beer throughout the ages, the roles of major ingredients (barley, yeast, water, hops) and the brewing process in the production of various styles of beer, and the origins of desirable and undesirable flavors and aromas.

For more information, contact Dr. Dennis D'Amico at ddamico@uconn.edu.
